

SE4296 is the most advanced 19" 4U height rack-mount computer designed for various kinds of servers, Computer Telephony Integration (CTI) and telecommunication applications. It's rugged, sturdy, full-sealed and well-cooled steel chassis is specially designed to withstand heavy shocks, dust, humidity, trembling vibration, and extremely high operating temperature in the mission-critical environment. With many enhancements to meet the newest technology changes, SE4296 is the best choice to integrate your rack-mount systems.

## Features

- 19" 4U rack-mount chassis meets EIA RS-310C industrial standard
- A lockable front door with indicators of power, HDD and Fan-Fail
- Power ON/OFF reset, switches inside the lockable door
- Easily detached and washable air filter
- Two USB connectors on front panels
- Dual 12cm ball-bearing cooling fans
- Enhanced drive bracket to hold three and one external drives
- Shock-mount cushion for the drive bracket
- Adjustable hold-down clamp to hold the PCI or ISA type add-on-card tightly
- Field replaceable power supply bracket for both normal PS/2 and mini-redundant type PSU
- Dimension: 482(W) x 481(D) x 177(H) mm

PCI based RAID kits, supporting up to three IDE HDDs with RAID 0, 1, 5 selections. The Disk bus is E-IDE with Ultra DMA support. The RAID kits provide a GUI manager for installation and maintenance. Hot-swap and hot-spare capabilities are also supported.

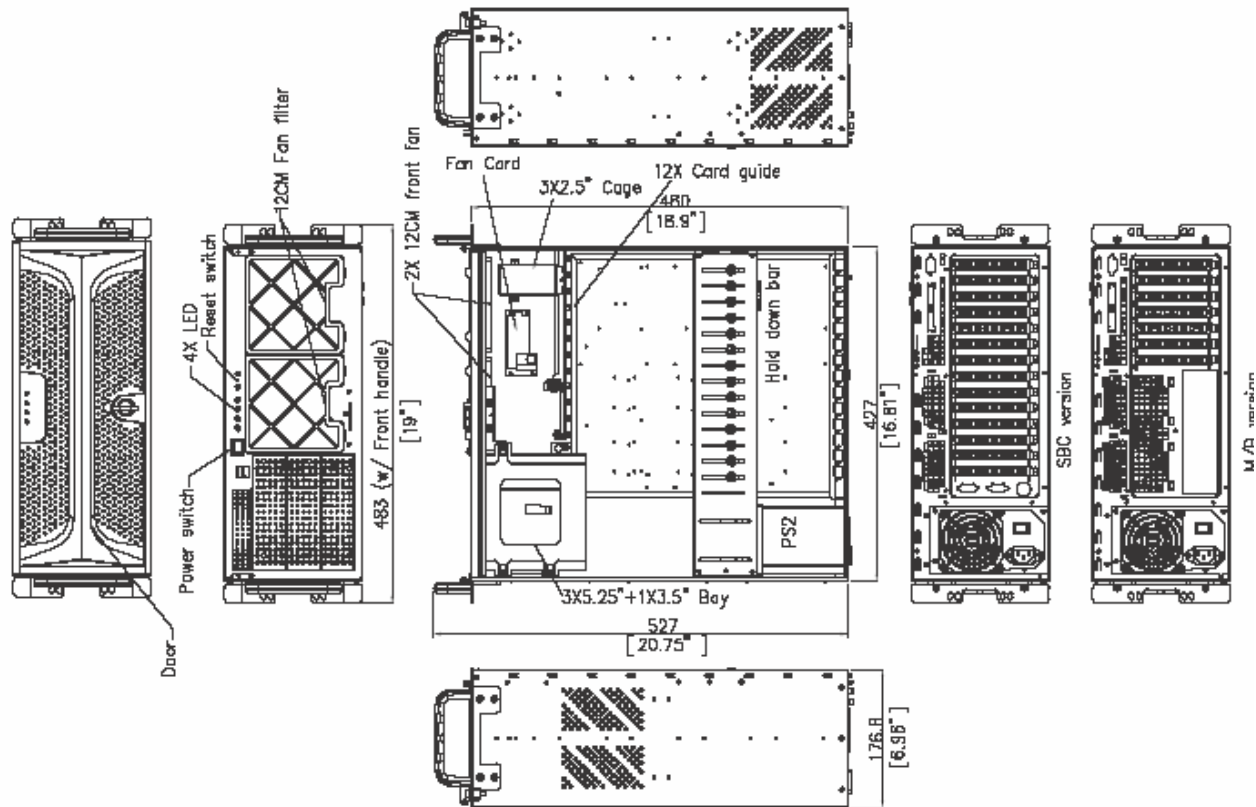

Power switch, reset switch and two USB 2.0 ports are on the front panel.

Friendly design of handles, you can lift and uninstall SE4296 comfortably and easily.

SE4296 adopts the newly designed card retainers to hold both the PCI and ISA type add-on-cards more tightly.

Flexible design to install power bracket can adapt to PS/2 type mini redundant power supply.

SE4296 enhances the drive bracket to integrate up to three 5.25" and one 3.5" disk drives within a limited space. (extra two 3.5" HDD drives for SE4296-MX).

Equipped with two 12cm dual ball bearing fans, AREMO-4196 provides the best ventilation up to 208CFM to expire heat from the system.

SE4296 reserves the largest space for the full-sized SBC to support up to 12 cards.

SE-4296 is equipped with two USB 2.0 connectors on the front panel to have a better security control.

The washable fan filter can be easily taken off to make an easier maintenance.

LED indicators include power, HDD, Fan fail and LAN functions.

The thumb lock offers the easy operation. Users can choose to lock it or not.
