Introducing our new Military Grade Switch

Industrial Computers has today launched the latest Techaya Gigabit Military Ethernet Switch, the MILTECH 912. This new switch is an ideal solution for Ethernet-equipped platforms, such as unmanned aerial, underwater & ground vehicles. Offering the best combination of size, weight, & cost in the industry, it is perfect for mobile platform deployment applications that have space and weight limitations. MIL-STD-810F tested, with 12 triple-speed ports the MILTECH 912 can be remotely managed to optimise communications & prioritise critical information traffic.

Ultra Strong & Compact Military Grade Switch

MILTECH 912

- 12 x switched 10/100/1000 managed ports
- IP67 ingress protection
- 178.1mm x 136mm x 47.1mm (LxWxH)
- +LAN: MIL-D-38999 connectors
- 1.150Kg weight
- -40c to +85c operating temperature

Industrial Computers Ltd is the exclusive UK Techaya distributor:

Techaya Inc. is a Prime Developer, Innovator and Manufacturer of Military Rugged and "Tailor-Made" IP Based Communication Solutions. Developed for military and harsh environment applications, the MILTECH product range features mechanical packaging enhancements designed for MIL-STD-810F airborne, marine and ground environmental compliance and high reliability. The unit has been especially hardened to improve ingress, impact, and shock/vibration protection, as well as eliminate all moving parts through passive cooling, and interface through sealed MIL-D-38999 circular connectors.

Why buy from Industrial Computers

We are a chassis manufacturer, systems integrator and solutions provider. One of our many strengths is that we have independent choice of product throughout the marketplace. This approach provides us with the flexibility to offer our customers the optimal product for their requirements.

With a Pan-European presence and offices in England and France, Industrial Computers specialises in the design and manufacture of Mission Critical Applied Computing Platforms. Serving markets including telecommunications, broadcast, military, transportation, industrial and medical, we work closely with our customers to conceive and manufacture the system their market and application requires.

- Commercial of the shelf (COTS) industrial computing systems
- Custom designed industrial computing systems
- Fully integrated/tested rackmount systems
- ISO9001: 2008 & ISO14001: 2004 approved facilities.
- Design & Manufacturing facilities in the UK and France.
- Typical lead times of 2-3 weeks for fully configured systems.
- Full revision control and serial number traceability.
- 5 –7 years and beyond longevity of supply.
- In-house temperature test chamber
- ETL approved products
