Industrial 3U and 4U Intel® 6th Generation systems

Industrial Computers Ltd provides a wide range of solutions for your Industrial applications. Today we are focusing on our 3U and 4U Intel® 6th Generation Skylake products. These systems are fully qualified and tested using the latest Industrial H110, C236 or Q170 Chipset Motherboards and have guaranteed long-term availability to Q4 2022. With multiple PCI and PCIe expansion slots, on-board Dual Gigabit LAN ports and support for Intel® Celeron to Core i3/i5/i7, with our C236 chipset version also supporting Xeon® processors, these motherboards provide the perfect solution for your industrial application. Both the 3U and 4U solutions have front lockable doors for added security, front USB ports, exceptional cooling and a choice of fixed Industrial power supply or redundant power supplies for mission-critical applications.

ICOM363 Intel® Q170 Revision Controlled 3U solution

ICOM363 4 x PCIe and 3 x PCI expansion slots

The ICOM363 is the ideal industrial computing solution for applications that require fast Intel® Core™ performance in a compact 3U Rackmount enclosure that still provides expansion for 4 PCI Express and 3 PCI full length, full height slots.
- 3U 19" Rackmount
- Intel® Q170 Chipset
- Up to 4Ghz Processor Speed
- High storage capabilities including RAID Functionality
- Intel® 6th Gen Celeron, Core i3/i5/i7 processors supported
- Up to 64GB of DDR4 Non-ECC Memory
- 20.8" Deep Industrial motherboard solution
- 5 to 7 years longevity of supply
- Short delivery options available
- Serialised and traceable
- Fully customisable

## ICOM462 Intel® C236 Revision Controlled 4U solution

ICOM462 4 x PCIe and 3 x PCI expansion slots

The ICOM462 is the perfect 6th Gen industrial computing solution for demanding applications that require longevity of supply and fast processing performance in a 4U Rackmount enclosure.
- 4U 19" Rackmount
- Intel® C236 Chipset
- Up to 4Ghz Processor Speed
- High storage capabilities including RAID Functionality
- Intel® 6th Gen Celeron, Core i3/i5/i7 and Xeon processors supported
- Up to 64GB of DDR4 ECC or Non-ECC Memory
- 18.1" Deep Industrial motherboard solution
- 5 to 7 years longevity of supply
- Short delivery options available
- Serialised and traceable
- Fully customisable

Why buy from Industrial Computers Ltd

We are a chassis manufacturer, systems integrator and solutions provider. One of our many strengths is that we have independent choice of product throughout the marketplace. This approach provides us with the flexibility to offer our customers the optimal product for their requirements.

With a Pan-European presence and offices in England and France, Industrial Computers specialises in the design and manufacture of Mission Critical Applied Computing Platforms. Serving markets including telecommunications, broadcast, military, transportation, industrial and medical, we work closely with our customers to conceive and manufacture the system their market and application requires.

- Commercial of the shelf (COTS) industrial computing systems
- Custom designed industrial computing systems
- Fully integrated/tested rackmount systems
- ISO9001: 2008 & ISO14001: 2004 approved facilities.
- Design & Manufacturing facilities in the UK and France.
- Typical lead times of 2-3 weeks for fully configured systems.
- Full revision control and serial number traceability.
- 5 –7 years and beyond longevity of supply.
- In-house temperature test chamber
- ETL approved products

All systems are fully configured & integrated to our customer's specifications including:
- Memory
- HDD/SSD
- Operating System
- Application Software
- PCI/PCIe card Installation

Military Platforms & Switches	Industrial Computing
